TOWER MELBOURNE

FEBRUARY 2017

PROJECT UPDATE.

When launched, Tower Melbourne set the standard for high rise central city living. When realised, it will continue to do so, with prime location, facilities and style.

A dispute with the owner of an adjoining owner concerning protection works for the property has caused significant delays to the project.

CEL Australia continues to be committed to the resolution of the ongoing legal proceedings and the delivery of Tower Melbourne.

Unfortunately due to the ongoing nature of these proceedings we are unable at this time, to advise when works will recommence on site or when Tower Melbourne will be completed.

We understand that the delays resulting from the protection works dispute have been frustrating for all concerned with this great project.

We understand and share your frustration with the delays to date, and again take this opportunity to share our continued commitment to resolution of this issue as soon as the legal process allows.

Once again thank you for your continued patience and understanding.
